

# Make an Advent Calendar

	<p><u>You will need:</u>          1 bottom page of calendar printed onto card,          1 top page of calendar printed onto card, felt          pen or coloured pencils, fine glue stick, metal          ruler, craft knife, cutting mat</p>
	<p>Print off a copy of the top and bottom          pages of the calendar.          Make a colourful design to cover the top          page of the calendar - you might like to          make a nativity scene, or a Christmas tree.</p>
	<p>Ask an adult to cut around the windows with          a craft knife. They will need to only cut round          three sides of each door. Cut a slit down the          middle of the '24' box, to make 2 doors. Don't          open the windows now, or they will not lie          flat again.</p>
	<p>Draw little pictures in each of the boxes in          the bottom page of the calendar. You might          like to draw the things you would like for          Christmas, or your family and friends. Draw a          picture of the baby Jesus in the big box.</p>
	<p>Put glue in the spaces round the boxes, and          round the edges of the bottom page of the          calendar. Be careful not to get any on the          boxes. Stick the two pages together, making          sure that the edges are lined up. Trim off the          extra paper round the edge.</p>
	<p>Now you can open one door every day from          the beginning of December until Christmas!</p>
